

GÖTEBORGS UNIVERSITET

Introductory course for post-graduate students at the University of Gothenburg

Date: 2011-01-25
Time: 8:30-13:00
Location: Conference Centre Wallenberg

The introductory course provides an introduction to the university and general information about post-graduate studies - and thereby serves as a supplement to local introductions arranged by faculties and departments. The course also offers a unique opportunity to meet post-graduate students from all over the university.

The introductory course is held in English for all postgraduate students at all faculties – both newly and previously admitted. At some faculties the introductory course is a mandatory and integrated part of the introduction arranged by the faculty. Other newly admitted post-graduate students at the university are strongly recommended to participate. Talk to your faculty office for more information about how the introduction is arranged at your faculty.

In addition to this introductory course, post-graduate students with an employment shall also take part of the mandatory *introductory course for staff members*. Follow the link below for more information.
